EPA SLN No. ID-010014

Active Ingredient: Imidacloprid (21.4%)

For control of leafhoppers and mealybugs on grapes.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This label must be in the possession of the user at time of pesticide application.

Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

RECOMMENDED APPLICATIONS		
CROP	Insect	Dosage
Grapes	Leafhoppers Mealybugs	16 to 32 fl oz/A
<p>REMARKS: For best results, make application(s) between budbreak and the pea-berry stage. Apply a total of 16 to 32 fl oz/A in one or two drip irrigation applications. Refer to EPA registered label for Directions For Use in Chemigation Systems.</p> <p>A total of 32 oz/A is recommended under the following conditions:</p> <ul style="list-style-type: none">(1) where vigorous vine growth is expected,(2) in warmer growing areas, OR(3) where mealybug populations are heavy. <p>Two applications at approximately 21- to 45-day intervals are recommended on coarse (sandy or rocky) soils and/or where the longest periods of protection are required.</p> <p>RESTRICTIONS: Observe a 30-day pre-harvest interval following soil application. Do not apply more than 32 fl oz/A per crop season. Do not exceed 0.5 lb active ingredient imidacloprid (ADMIRE + PROVADO) per acre per year.</p>
